WORK EXPERIENCE

Working Remotely   2016 — Present (4 years)

Dataviz engineer - D3.js, React, Angular, Vue, WebGL

I completed more than 50+ data visualization and analytics related projects and only highlighting 3 of them:

Datastax - I worked on react and d3.js based class diagram implementation. Completed visualization is very smooth, fast and really insightful as well. It played key role in product demoability and sellability.

Climate.ai - Project involved mapping together of live temperature, precipitation , water vapour and wind flowing layers. It was complex task, which required automatization of data download from nomads.ncep.noaa.gov, transforming static, GIS specific data to video format, fetching temperature data from API endpoints, tweaking with WebGL, canvas, SVG settings and combining all of them into one, highly performant and beautiful map.

Justicemapping - I worked on challenging and beautiful visualizations, which precisely highlighted justice system status in Somalia. I used d3.js as a main tool and had to use some Geo information system tools as well. At the end, we had very smooth and engaging product, which I believe will accelerate justice reforms in needed areas.

Bank Of Georgia   2014 — 2018 (4 years)

Full Stack .Net Developer - C#, Asp.Net, Angular

Development and maintenance of HR platform (reporting and hiring module). Took major part in creating of employees 360 analytics platform, which became extremely popular in upper level management. I completed complex and very engaging D3.js based final report visualization , which further increased interest of the whole platform.

PROUD OF

- Fiverr Pro member - Hand vetted freelancers for stellar quality
- Member of data visualization society and community
- Winner of dataviz hackathon "Back to the future - 2018"
- Consistently (4 years in a row) "Top rated" freelancer on Upwork

EDUCATION

Master: Software engineering (Iliauni)   2015 — 2017

100% scholarship grant

Bachelor: Econometrics direction (TSU)   2011 — 2015

3.9 GPA, 100% scholarship grant , three times stipend winner
